APPLICATION FOR AMENDMENT
OF POLLUTION CONTROL PERMIT PE-395

THIS APPLICATION is to be filed with the Director of Pollution Control, Parliament Buildings, Victoria, B.C. V8V 1X4.

Any person who qualifies as an objector under section 13 of the *Pollution Control Act* may, within 30 days of the date of application, or within 30 days of the date of publication in *The British Columbia Gazette* or in a newspaper, or where service is required, within 30 days of serving a copy of the application, file with the Director at the above address an objection in writing to the granting of an amendment, stating the manner in which he is affected.

Preamble—The purpose of this application is to amend our present Permit PE-395 to reflect actual effluent flow in the east sewer.

Brian Victor Smyth, of Ercos Industries Limited, 100 Forester Street, North Vancouver, B.C. V7H 1W4, hereby applies for amendments, as described below, to Pollution Control Permit PE-395, granted on April 8, 1971, which authorized the discharge of effluent from a sodium chloride manufacturing plant located at North Vancouver, B.C., to Burrard Inlet.

Amendments Requested:

Increase east sewer quantity of effluent discharge from an average of 600,000 imperial gallons a day to 1,250,000 imperial gallons a day. Increased flow is due in part to plant uprating and process optimization since 1971, but the major contributor to the increased flow is the use of well water in the process rather than city water. The well water is used mainly for cooling in heat exchangers and condensers. The well water is 2 to 4 times warmer than city water and therefore larger volumes are required for cooling, resulting in increased discharges in the east sewer.

There are no changes to the plan which accompanied the original permit.

This application, dated on February 15, 1980, was posted on the ground in accordance with the Pollution Control Regulations.
